

MINING, BUSINESS AND STOCKS.

TETRO STOCK IS STILL IN FAVOR.

Brokers Had Plenty of Buying Orders in Their Possession Today; Few Wanted to Sell.

TOP NOTCH NOT YET REACHED.

At Least That is the Opinion Expressed by Some—Other Tintic Favorites in Demand.

The business transacted during the sale of the Mining Exchange this forenoon amounted to \$9,650 shares, the same selling for \$10,420. The market, generally speaking, was in good tone. Tetro still continues in favor and the indications point strongly that it has not yet reached the top notch. Brokers had few selling orders to execute but on the contrary there were plenty of buyers in the field. Advice received from Superintendent Brown this morning told a story of further improvement in the mine and it would not be surprising if the property developed into one of great magnitude. One thing can be said to the credit of the management, at no time has any attempt been made to boom the stock; on the other hand the facts concerning developments have not been withheld. It is claimed that at the present time there is one to the value of \$200,000 exposed in the mine.

Con. Mercut opened weak, but strengthened as the call progressed. Star Consolidated held even with yesterday, while Yankee Co. was bought at 63 cents, but relaxed on the open board. May Day displayed a slight upward tendency.

THE LEAD COMBINATIONS.

Review of Present Conditions by a New York Publication.

In summing up the lead situation in the United States, the Engineering & Mining Journal of current issue, says: "With the organization of the United Lead Company and the new concern which is taking over all the principal mines of the Colorado & Alamosa, the lead industry of the United States has become fairly well consolidated. The mines of the Colorado & Alamosa are the chief producers of the raw material, their product, which is shipped in the form of high-grade galena concentrates, furnishing about 40 per cent of the domestic production of lead. The smelting industry is effectively concentrated in the hands of the American Smelting & Refining company. The manufacturing industry is now practically divided between the National Lead company and the United Lead company. There are a few concerns which remain outside, but they are of no great importance. The National Lead company and the United Lead company will be to a certain extent competitors, although at the present time there is considerable difference in their principal interests. The National Lead company is essentially a producer of white and red lead, but to a comparatively small extent is engaged in the manufacture of sheet, pipe and other metallic products. The United Lead company has taken over the principal factories making shot, sheet, pipe and

lead alloys, but has also acquired certain white lead works which had remained heretofore independent. One of its chief assets in the last two years is the property of the Union Lead & Oil company, including the Bradley patents, the value of which is, as yet, undetermined. It has been given out at various times during the last two or three years that they were going to revolutionize the white lead business by effecting an overwhelming reduction in the cost of production, but so far, this has not been accomplished.

"There have been various rumors as to the effect that these recent consolidations would have upon the American Smelting & Refining company and the lead business in general. In spite of the fact that the National Lead company refused to enter the United Lead company, it is probable that there will be no serious competition between the two. Standard Oil interests are said to be in the 'Coeur d'Alene' combination. They are known to be in the American Smelting & Refining company and the United Lead company. They are supposed to be very largely interested in the National Lead company. As far as the Coeur d'Alene combination is concerned, it is probable that the interest of the Standard people is limited to the smelting plant at Montpelier, Idaho, which was owned by Mr. Rockefeller, and has been put into the consolidation at a high nominal value. This is, however, enough to give Standard interests a considerable share in the company.

"It is a reasonable surmise, therefore, that the four big companies will co-operate to a large extent upon the basis of a community of interest, requiring the independent purchasers on the one hand and the ultimate consumers of the product on the other hand to yield to the independent lead with respect to the independent lead. It will also be better able to defeat projects for competitive smelting works in the west, as to which there has been more or less talk from time to time."

CHERRY CREEK MINES.

Progress Being Made at the Imperial—In Utah's Gold Mountain.

Sylvester Cannon, consulting engineer for the Old Imperial and other mines at Cherry Creek, N. M., states that developments are being pushed vigorously, and that the shaft at the Imperial has been let down to the depth of 250 feet. Some very good ore has been encountered, however, the permanent bottom is not to be tapped.

Of the Holland Gold Mining company's properties in the Gold Mountain district, this state, Mr. Cannon states that the shaft at the active list. The old tunnel, which has been driven for a distance of several hundred feet, is to be continued and in addition, a new shaft is to be performed up on the surface. The company proposes to let the work out by contract.

NEW COMPRESSOR PLANT.

Will Be Installed by New Columbia Company in Bingham.

The new managers of the Columbia Company are getting ready to carry on an extensive campaign at Bingham and among the early improvements to be made is the installation of an air compressor and machine drills. While plans will be carried out execution at once for the erection of reduction works at the site of a concentrator, the probabilities are that arrangements will be made in the meantime to employ one of the present Bingham mills for the reduction of the low grade ore.

The "News" was informed from Bingham today that overtures had been made to the Bemis Brothers, owners of the Dewey plant, by someone supposed to represent the new Columbia management; that a price had been named and that there was a possibility of a sale being consummated.

This would not be a wise move on the part of the new company.

LITTLE CHIEF STRIKE.

Officers of Company Dispute Claims of the Snowflake Manager.

The story printed in a morning paper to the effect that the Snowflake Mining company assert the strike effected by the Little Chief mine was made in the territory of the former is not taken seriously on Brokers' Road today. The company seems to be absolutely no doubt about the Little Chief having rightful claim to all the ore in sight at the present time.

Joseph Oberdorfer, one of the directors of the latter, declared his company knows exactly where its title lies and that the result of the strike is not a long time past. The find was made at a point about 170 feet north of the shaft, and in ground which the company has held undisputed possession for a long time past. President Moritz offered to wage \$10,000 that the strike was made in Little Chief ground.

A representative from the mine this forenoon brought the information that the ore is yet considerably mixed, yet the outlook is very bright.

LOUISE MINE DYNAMITED.

Hoisting Plant Near Cheyenne Completely Destroyed—No Clue to Mischance.

Special Correspondence.

Cheyenne, Wyo., Sept. 14.—At 1 o'clock Sunday morning the shaft house of the Louise mine, 25 miles west of Cheyenne was dynamited by unknown miscreants. Fifty feet of fuse and a quantity of giant powder was stolen from the store room and probably were used to destroy the shaft-house. The hoisting plant, consisting of a large completely destroyed, but other machinery escaped damage. The machinery belonged to O'Reilly Bros., who have a contract to sink the Louise 200 feet.

Henry Schwartz, superintendent of the Hecla Mining company which owns the Louise, says that the wrecking of the machinery will delay work only a short time. There is not the slightest clue to the identity of the perpetrators of the outrage.

NEW YORK'S MILLING ORE.

Good Body Said to Have Been Encountered on the 400-Foot Level.

There were rumors afloat on the streets yesterday afternoon to the effect that some important developments had taken place in the New York Boulders mine at Park City, Nev. Barnett, when seen, disclaimed any knowledge of anything of the kind, but later in the day it developed that a telephone message had been received from Mr. Barnett in which he imparted information of sufficient consequence for President R. G. Wilson to pack his grip and otherwise make ready to make a trip to the mine this forenoon.

It was learned, also, that the cross-cut on the 400-foot level had encountered ore, that the vein was broken into last Sunday and that the developments since had resulted in opening up a good body of milling ore, which was the real cause of President Wilson pulling out for the mine on the early train.

SUNSHINE MINE AND MILL CLOSED.

It is Reported from Camp that The Company Owes its Employees \$7,500 for Wages.

TWENTY FAMILIES AFFECTED.

Some of Them Not in the Best of Circumstances—Gold Brick Sold.

A Few Days Ago.

(Special to the "News.")

Sunshine, Sept. 15.—The Sunshine mine and mill was closed down night before last upon orders from Manager Laurence Harris, now in Salt Lake, who telephoned that there would be no pay forthcoming yesterday. The company is said to be behind in its pay rolls one and one-half months. The property has been in operation since last March, and the company was employing 50 men; there are about 20 families in the camp and some of them are not in the best of circumstances. It is claimed that the back pay due the men amounts to \$7,500.

R. E. Bush is superintendent of the mine and W. J. Rickles foreman.

The men claim the management sent a gold brick, the product of the mill, to Salt Lake a few days ago which would have probably squared accounts with them.

GENERAL WEAVER'S SUCCESS.

Seems to Have Solved the Problem of Saving Snake River Gold.

The operations of Gen. J. L. Weaver on the Snake river in Idaho, are resulting quite successfully. So confident was he that the hours gold, contained in the sands of the great stream, could be saved that he went to great expense in rigging up a dredge, which has been in commission for the past two months or more.

At the request of Judge Olden, president of the Bank of Commerce of Boise, Ed. Bernon, a mining engineer of that place, made an inspection of the work recently, and expressed himself as being very agreeably surprised at the results being accomplished. He says:

"I inspected the dredge and mines that Gen. Weaver is operating on the Snake river. I prospected the gravel bar and found by pan test from 35 to 60 cents to the cubic yard. The general haul washed about 15 or 20 yards before I got there. He thought he had about \$100, but the Snake river gold is deceiving. I will put it at \$45, that would be about \$3.00 to the cubic yard. Your work is comparable to handling 3,000 yards in 24 hours. You can easily see that that means. When I say that the Snake river gold is deceiving, I mean this, that it is very fine and flakey, making it more bulky, and a person not accustomed to handling that class of gold dust will be easily deceived in guessing at its value. It is the highest grade of gold we have in this country, about 19 fineness.

"You no doubt will be surprised at the discrepancy between my panning test, which shows from 35 to 60 cents per cubic yard, and the results obtained with the dredge. This is but a variation of this—the gravel is thoroughly impregnated with those fine particles of gold, so light and fine that you cannot save them in a pan nor any other device that is known, except your tank and saving devices connected with it. Hence the discrepancy.

"The general had the misfortune of breaking a small cog wheel in the machine which delayed him several days in making his test run. The wheel came the night before I left for Boise. As we left the next morning he made a run of 25 minutes and the machine drew 15 inches out of the tank that exposed the upper quick silver cups and to our astonishment the quick silver was coated with that almost liquid gold. With the best gold saving machine that we have had all this gold would be lost. It has never been saved. I am convinced that the miners have lost a fortune. Their gold is saved. I am satisfied that your method of saving gold will revolutionize the mining industry in this country."

CONCENTRATES.

Eight cars of Butler-Liberal ore are at the Pioneer sample at Sandy.

Two cars of Tetro first class and one car of second class ore are in today's market.

Walter C. Orem, manager of the York mine in Bingham, is at that property today.

George H. Robinson is making an inspection of the Kennebec properties in Big Cottonwood canyon.

Ore will begin moving towards the smelters from the Continental-Alta mines at Alta next Monday.

Acting Manager Kinnon of the Maestri mines left last night for Milford. He was accompanied by Col. Henry Altman.

Manager Jackling of the Utah Copper company, is expected to arrive from Colorado tomorrow. He will be accompanied by President McNeill.

J. W. Cairns left for Bingham this forenoon to start work on the Erie property which is to undergo a vigorous campaign of development.

Work will commence in a few days on the new hoist for a Columbia Consolidated Mining company's power plant in Little Cottonwood canyon.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$48, 200; base bullion, \$40,500. Total, \$88,700.

President Mucklow and Manager Alexander of the Maestri company will depart for Milford tonight. They will be accompanied by H. E. Freuden-thal.

Geo. K. Fischer, constructing engineer of the Utah Con., has returned from the east and was in consultation with Manager Channing this morning concerning the plans for the new addition to the smelter near Murray.

Manager M. M. Johnson of the exploration department of the Newhouse mines, has returned from a trip of several weeks' duration in the east. He visited the copper regions of Michigan for the purpose of obtaining pointers concerning the mines there.

The officers of the Columbia Copper company have called a special meeting of the stockholders of that corporation for the purpose of ratifying the action of the last of the directors in selling the property to the Ohio syndicate mentioned in yesterday's "News." The date set for the gathering is Oct. 1, at 4:30 p. m.

STOCKS WERE OFFERED FREELY.

Depression in Foreign Markets Had a Material Effect in New York.

FROSTS IN THE CORN BELT.

Effect Was to Send Up the Price of Corn—U. S. Steel Again Led the Downward Movement.

SOCIAL AND PERSONAL.

The notable event of yesterday was the wedding of Miss Irene M. Squires and Mr. Royal G. Williams, the ceremony being performed at 7 o'clock by Bishop O. F. Whitney, at the bride's home, and a reception being held afterward for the relatives and friends. The rooms were beautifully decorated, and the affair altogether a charming one. Mr. and Mrs. Williams will be at home after Oct. 1 at 863 Second street.

Mrs. James A. Miner entertained informally at luncheon today.

Miss Rebecca Morris has returned from a two weeks' stay with friends in Logan.

The Daughters of the American Revolution have issued their program for the year's meetings, the first of which takes place next Thursday at the home of Mrs. Isabel Sears in Waterloo.

The program is mostly printed on linen paper and the list of topics promises some interesting meetings.

Miss Bessie Rich of Pocatello is visiting with Miss Virginia Jones.

Miss Lillie Coumberth entertained last evening informally in honor of Miss Bessie Rich, who is the guest of Miss Virginia Jones.

Today was the last visitor's day of the season at the Country club, and a large number were present, the bright day making everything doubly attractive.

Miss Ida Savage, who has been spending the summer in California, has returned.

FEAST OF THE CROSS.

It Passed Off Without any Disturbance in Beirut.

Constantinople, Sept. 15.—The feast of the cross passed off without disturbance at Beirut.

Contrary to the official representations, advices from good sources say the Macedonian insurgents are holding their own at several points, and are inflicting defeats on the Turks in the districts of Morpova and Melnik, 45 miles from Sofia.

Four battalions have almost been annihilated. The local authorities at Monastir are seeking to prevent the foreign consuls and correspondents from leaving the town under the allegation that their lives will be endangered.

It is said that the sultan was much annoyed when he learned that Albanian troops had been dispatched to Adrianople.

GEN. BELL'S POSITION.

Holds Everybody is Amenable to Articles of War.

Cripple Creek, Colo., Sept. 15.—Adjutant Gen. Bell will appear in the district court on Friday either in person, if necessary or by representative to make a reply and return of the writs of habeas corpus which were issued against Gen. Bell, who has been charged with the detention of four prisoners in the military guardhouse. In his answer to the complaint Gen. Bell will set up the fact that he will appear in the district court on Friday either in person, if necessary or by representative to make a reply and return of the writs of habeas corpus which were issued against Gen. Bell, who has been charged with the detention of four prisoners in the military guardhouse. In his answer to the complaint Gen. Bell will set up the fact that he will appear in the district court on Friday either in person, if necessary or by representative to make a reply and return of the writs of habeas corpus which were issued against Gen. Bell, who has been charged with the detention of four prisoners in the military guardhouse. In his answer to the complaint Gen. Bell will set up the fact that he will appear in the district court on Friday either in person, if necessary or by representative to make a reply and return of the writs of habeas corpus which were issued against Gen.
